

Complete your Office 365 cloud migration

Top Reasons to Choose Printix Cloud Print Management

1. Print Server Elimination

Printing is automated and maintained via the Printix cloud service. No print servers, zero overhead for IT administrators and significant savings for your business.

2. Cloud-based print infrastructure

Printix is all you will ever need, with no requirement to add or maintain any additional infrastructure, databases or management overhead. Simply print.

3. Enhanced User Experience

Your current user printing experience is made even easier for both staff and visitors, whilst added BYOD and remote print enablement expands your printing service outside the confines of your office.

4. Less IT Management

With all infrastructure and support provided in the cloud, say goodbye to those pesky printer related support calls and say hello to happier and more productive users. Self-provisioning tools, enable user access to common functions and print workflows.

5. Secure and Mobile

Print from anywhere and from any device. When you're ready, use your mobile device to print, collect and go. You can even re-print without having to submit your print jobs all over again.

6. Microsoft Azure and G Suite integration

Printix is integrated with Microsoft Azure AD and Google G Suite so you can offer a true cloud workplace with common single sign on via Office 365 or G Suite. Provide ease and confidence for users.

7. No Risk Approach

With a free 1-month trial period, followed by consumption based pricing plans, where you only pay if users print, Printix allows you to migrate your print infrastructure to a cloud managed service whilst saving both time and money.

8. Highest data security requirements

Secure and encrypt your documents and meet increasing privacy and data compliance regulations and with Printix, your document printing remains secure and protected on your local network.

9. Enterprise ready, vendor agnostic

Support multiple print queues, per printer (all makes & models) with user default configuration maintained, Printix is a simple to deploy Enterprise grade application.

10. Branch Printing

Extend the same high-level printing service your HQ office users have, to any branch office regardless of location without the need to be onsite or add any additional infrastructure. Pricing based on usage so even the smallest printing sites can benefit and be included as part of a single approach strategy.

Learn More About Printix

Printix is available for a free 30-day test drive. Simply download and install the Printix Client software for Windows or Mac at www.printix.net, and we'll take care of the rest. As a Microsoft ISV, we're helping thousands of end customers and partners worldwide transition their current Windows or other print product to a fully supported cloud based service.
